FCC RELEASES NEW TELEPHONE SUBSCRIBERSHIP REPORT

Washington, D.C. – The Federal Communications Commission (FCC) today released its latest report on telephone subscribership levels in the United States. The report presents subscribership statistics based on the Current Population Survey (CPS) conducted by the Census Bureau in November 2001. Statistics from that survey estimated that 94.9% of all households in the United States had telephone service in November 2001. The report also shows subscribership levels by state, income level, race, age, household size, and employment status.

Statistical Summary

In November 2001:

- The telephone subscribership penetration rate in the U.S. was 94.9%, up 0.8% from November 2000. This increase is statistically significant.
- The telephone penetration rate was 79.1% for households with annual incomes below \$5,000, while the rate for households with incomes above \$75,000 was 98.9%.
- By state, the penetration rates ranged from a low of 90.9% in Arkansas to a high of 98.8% in New Hampshire.
- Households headed by whites had a penetration rate of 95.6%, while those headed by blacks had a rate of 90.3% and those headed by Hispanics had a rate of 90.8%.
- By age, penetration rates ranged from 87.8% for households headed by a person under 25 to 96.7% for households headed by a person over 70.
- Households with one person had a penetration rate of 92.0%, compared to a rate of 96.2% for households with four or five persons.
- The penetration rate for unemployed adults was 92.0%, while the rate for employed adults was 96.2%.
- Over 1% of households report that they have only a wireless phone.

This report is updated three times a year and is available in the FCC's Reference Information Center, Courtyard Level, 445 12th Street SW, Washington, DC 20554.
